

HARD WATER RINSE ADDITIVE

DESCRIPTION

HARD WATER RINSE ADDITIVE is a concentrated rinse additive for use in hard water areas. When used in the final rinse of spray type machines or in rinse tanks, it lowers the surface tension of the water and prevents hard water film build up on glassware, tableware, china, etc.

COLOR: Light green

DIRECTIONS

This product is automatically dispensed into the dishmachine. A representative from your chemical supplier will establish the proper dilution rate depending on machine type and water conditions.

PRODUCT FEATURES / CUSTOMER BENEFITS

- Highly Concentrated / Economical use costs
- Non-foaming regardless of water temperature / Spot-free drying
- Unique blend of wetting agents / Glassware & utensils dry to a sparkling shine
