

BRILLIANT ENZYME

DESCRIPTION

BRILLIANT is an enzyme activated powder, designed for use as a presoak for all types of flatware. When properly used, it also removes tarnish and stains from silver plate and stainless steel flatware. BRILLIANT dissolves readily and produces excellent cleaning results in hard and soft water conditions.

DIRECTIONS

PRE-SOAK: To soften food soil on flatware, presoak all flatware prior to machine washing in a solution containing 1 oz. BRILLIANT per 2 gallons of hot water. Mix solution in plastic tub before adding flatware.

DETARNISHING SILVER: Submerge aluminum foil in solution and place it on bottom of plastic bus tub, shiny side up. Place tableware in contact with foil.

PRODUCT FEATURES / CUSTOMER BENEFITS

- Highly concentrated / Economical use costs
- Water softening agents / Excellent results in hard or soft water
- Breaks down food soils / Improves washing results
