VALUE *green* SOLID

DISHMACHINE DETERGENT

DESCRIPTION

VALUE GREEN SOLID DISHMACHINE DETERGENT utilizes the latest ingredients that are less hazardous to the environment without sacrificing performance. This solid contains no hydroxides, phosphates (STPP), chlorine or nitrilotriacetate (NTA). VALUE GREEN SOLID DISHMACHINE DETERGENT rinses quickly and is suited for use in all types of low and high temperature dishmachines. Provides excellent scale inhibiting properties and is safe for use on aluminum and other soft metal surfaces.

DIRECTIONS

1. Remove cap from the container and invert capsule so that open surface is pointing downward into the bowl dispenser.
2. Do not get product on hands or into eyes.
3. Turn machine on so the water will feed the dispenser unit and dissolve product into dish washing machine.
4. For consistent feeding of product, it is suggested that cold or warm water be used to dissolve product and suggested water feed temperature not to exceed 140°F.
5. Dish machine wash tank water will yield maximum results when the wash temperature is maintained at 145-155°F.

If the water temperatures are too low, fat soils are not softened and cleaning efficiency will decrease.

If water is too hot, soils may become flash dried to the kitchenware, thus making it more difficult to remove.

PRODUCT FEATURES / CUSTOMER BENEFITS

- Economical use cost / Long lasting cleaning
- Excellent grease cutting / Saves time and labor
- Phosphate-free, Readily Biodegradable / Environmentally responsible
- Self-contained dispensing jar / Safe and easy to use

No.	Size	Qty./Unit
• 5008	8 Lbs. jar	4/Case
